Cap Inspection at San Jacinto River Waste Pits Superfund Site

On Tuesday October 30, 2012, OSC Leos conducted a quarterly site inspection at the San Jacinto River Waste Pits superfund site in Highland, Tx. This inspection is the 4th since the removal action was completed in July 2011. The inspection reviewed the site security fencing, integrity of the armor cap, and site signage. Along with visual observations, the responsible parties have also conducted hydrographic and topographic surveys on top of the cap to ensure a minimum design thickness. During the cap inspection Channel 13 news appeared and asked questions about EPA activities. The focus of their news story focused on the current lawsuit against the responsible parties from the local Vietnamese fisherman and Harris county.
